

# Finding The Open Fuse Is Now as Easy as *easyID*<sup>TM</sup>

## With the New Cooper Bussmann® Fusetron® *easyID*<sup>TM</sup> Class RK5 Cartridge Fuses

Now, a drop-in replacement is available to consumers that want to find their open fuses faster. The Cooper Bussmann line of FRN-R 250 volt Class RK5 cartridge fuses, with *easyID* indication, makes it easy to locate the open fuse when the power goes out.

### Popular Ratings

Available in ratings of 15, 20, 30, 40, 50 and 60 amps, this new fuse line covers the great majority of consumer fuse replacement needs.

### Case Sizes That Fit Existing Holders and Blocks

The FRN-R\_ID 30 and 60 amp fuse case sizes fit any existing RK1, RK5, K5 and H 30 and 60 amp fuse blocks and holders, so it's easy to sell into a large, already installed fuse base.

### Easy Upgrade for One-Time and Renewable Fuses Installations

Because the Fusetron *easyID* fuses fit any Class K5 or H fuse blocks and holders, consumers now have the opportunity to upgrade their circuit protection. Instead of non-current limiting, general purpose Class K5 or renewable Class H fuses, they can install true, RK5 dual-element, time-delay circuit protection. The separate overload and short-circuit elements of the Fusetron fuse allow harmless, temporary overloads to pass while reacting quickly to short-circuit current levels.

### Attractive Retail Packaging

Specially packaged in distinctive retail cards, these fuses stand out in any retail setting as being the superior circuit protection purchase.

### Also Available in Standard Packs

These and other FRN-R *easyID* fuse ratings are available in our standard pack offerings.

Two fuses are blister packed for attractive display.

# The Fusetron® *easyID*™ Line of RK5 Indicating Fuses

## Easy To Sell Into Existing Installed Fuse Base

The Fusetron RK5 fuse with *easyID* can replace these competitive fuses.

### Cross Reference Guide

Fuse Class	Ferraz-Shawmut Catalog Number	Littelfuse Catalog Number
RK5	TR	FLNR
K5	OT	NLN
H	RF	RLN
